

Single Platform, Multiple Audits !

- **Single login** to conduct multi types of audits
- Absolute **zero manual** work
- Pick your **laptop, tablet, mobile** to start
- **Easy** but **effective**
- **Consolidated** as well as **exclusive** dashboards

The Problem Statement

LOSS

in terms of efforts,
productivity, quality
and safety

SLOWER

manual process
slows down entire
process of
auditing and NC
closing

STRUGGLE

huge struggle in
tracking,
consolidating and
storing data

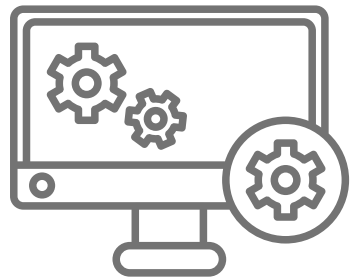

ERRORPRONE

human errors
tend to erroneous
audits

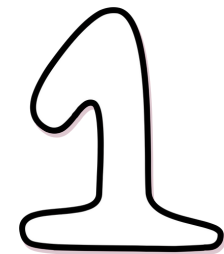

IMPACT

lack of proactive
and correct
decisions due to
non availability of
live data
monitoring

DIGITAL

complete transformation of traditional manual approach to digital

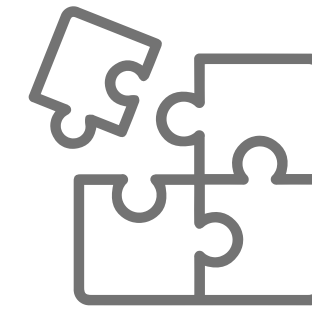

SINGLE

unique single platform to conduct audits including LPA, 5S, SAFETY, GEMBA WALK

SHOP TO TOP

platform that addresses pain areas of users right from shop floor to top management

UNIFORMITY

removes ambiguity, errors and brings uniformity within audit process

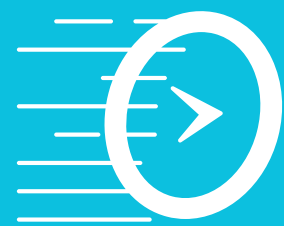

CLOUD

secure cloud solution that reduces huge financial investment burden

100 % AUDIT RATE

boosts the engagement rapidly resulting increase in audit completion and observation closure rates

100 % TIMELY CLOSURE

instant reminders, alerts and guided user experience expedites the audit process

SPOT THE PATTERN

live analytics that highlights the areas of attention require

IMMEDIATE RETURNS

in terms of increased productivity, quality, safety and manpower savings

**Value
Proposition**

Key Features

AUTO SCHEDULING

complete scheduling of audits without human intervention

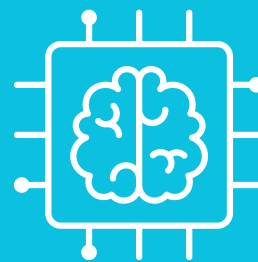

SELFIE

selfie to start the audit that brings more transparency in the process

TEMPLATE BANK

ready to use industry standard templates

INTELLIGENCE

that makes entire process just clickable

Key Features

LIVE ANALYTICS

for right and timely decisions

REWARDS

helps to boost the engagement and audit rate

DECISIVE REPORTS

precise reports for accurate decisions to avoid blind spots and delays

ALERTS AND REMINDERS

reminders and alerts for quick turn around of scheduled and assigned tasks

- Cloud based secure platform with very high uptime & reliability
- World's strongest encryption i.e. SHA-2 & 2048 bit encryption to protect data transmission
- Secure data storage using redundant database server cluster and securely managed storage
- Real time data backup along with scheduled nightly backups
- JWT Token authentication for session security
- Role based access control
- User session management to restrict unauthorized user access
- Techniques as network address translation, port redirection to safeguard servers
- Monitoring of network through intrusion detection and prevention system (IDS / IPS)

**Data In
Safe Hands**

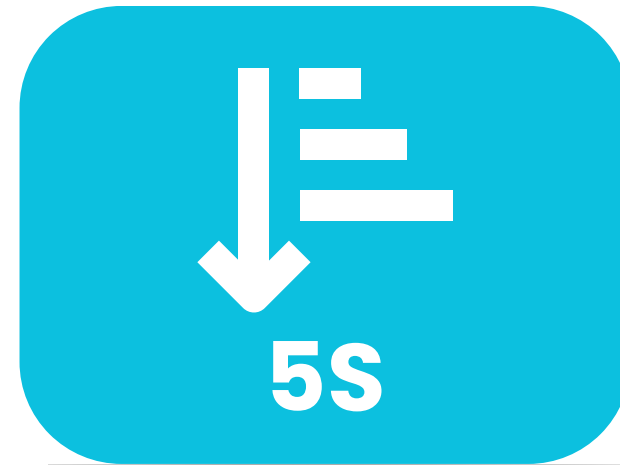

Single Platform For Multiple Audits

Capture your observations while you take a walk

Confirm process adherence by different level audits

Make principle adherence on the click

Immediate reporting of health and safety concerns

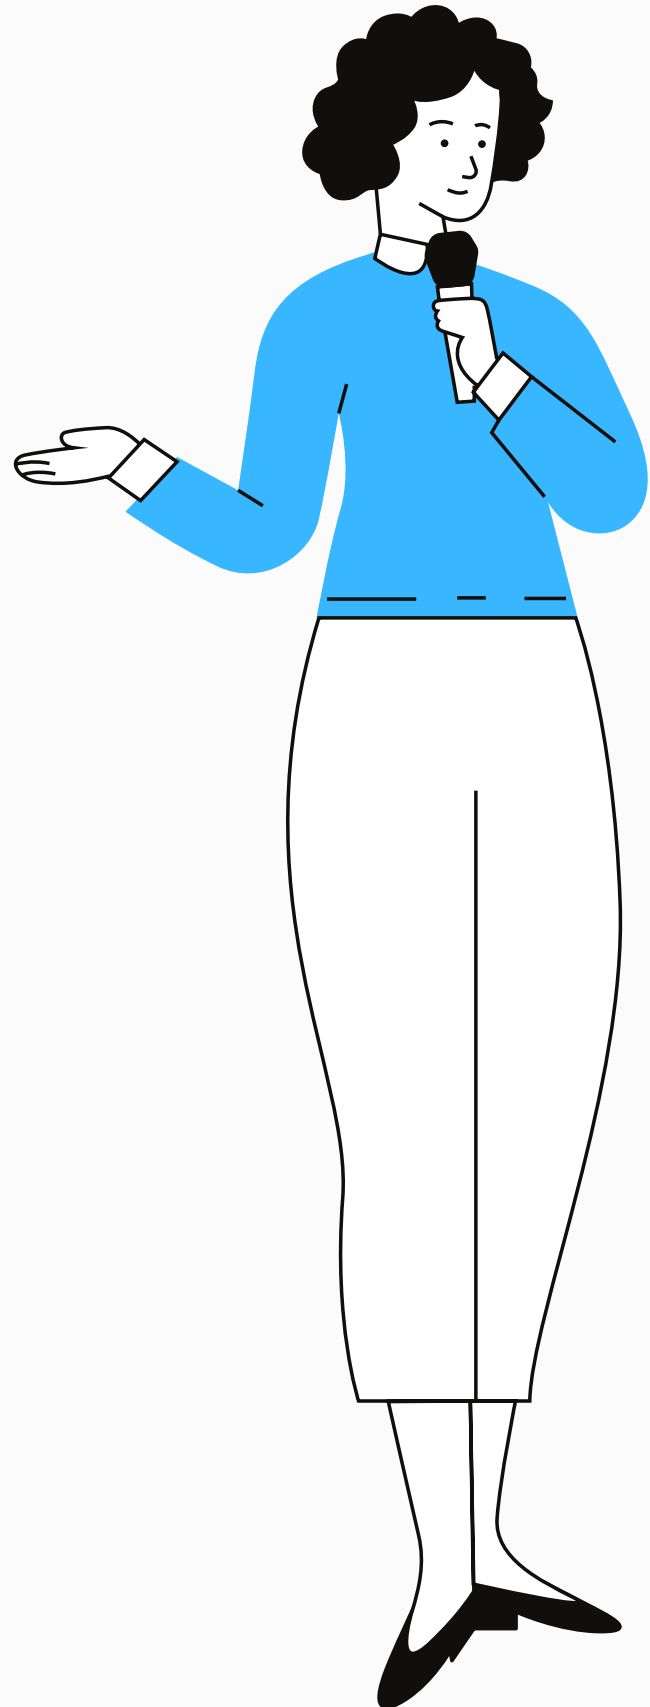

Achieve quality that make your customer smile

GEMBA WALK

Click the audit while you walk !

PROBLEM STATEMENTS

1

Random Gemba walks lead to confusion

2

No control over observation prioritization and closure

3

Unhappy management due to **sluggish** response to observations

4

Nightmare to **consolidate** and present **comparative** analysis

5

Human dependency for every process, action and data

6

Painful to manage **historical** data

7

Lack of dashboard highlighting **business critical** parameters

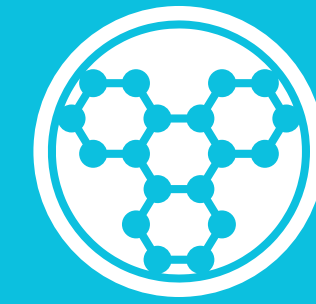

VALUE PROPOSITION

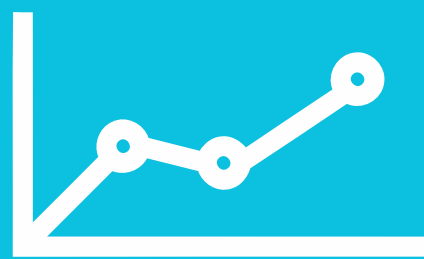

Quicker & more efficient

Exact tracking of actions

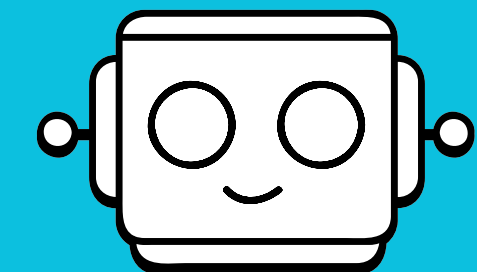

Standardisation of information

Easy data sharing, & decision making

High transparency & accuracy

Higher man hour savings

ANY TIME, ANY GEMBA

THEME BASED

Make your Gemba Walk theme specific by focusing on themes like **SAFETY, QUALITY, 5S** etc.

WASTE BASED

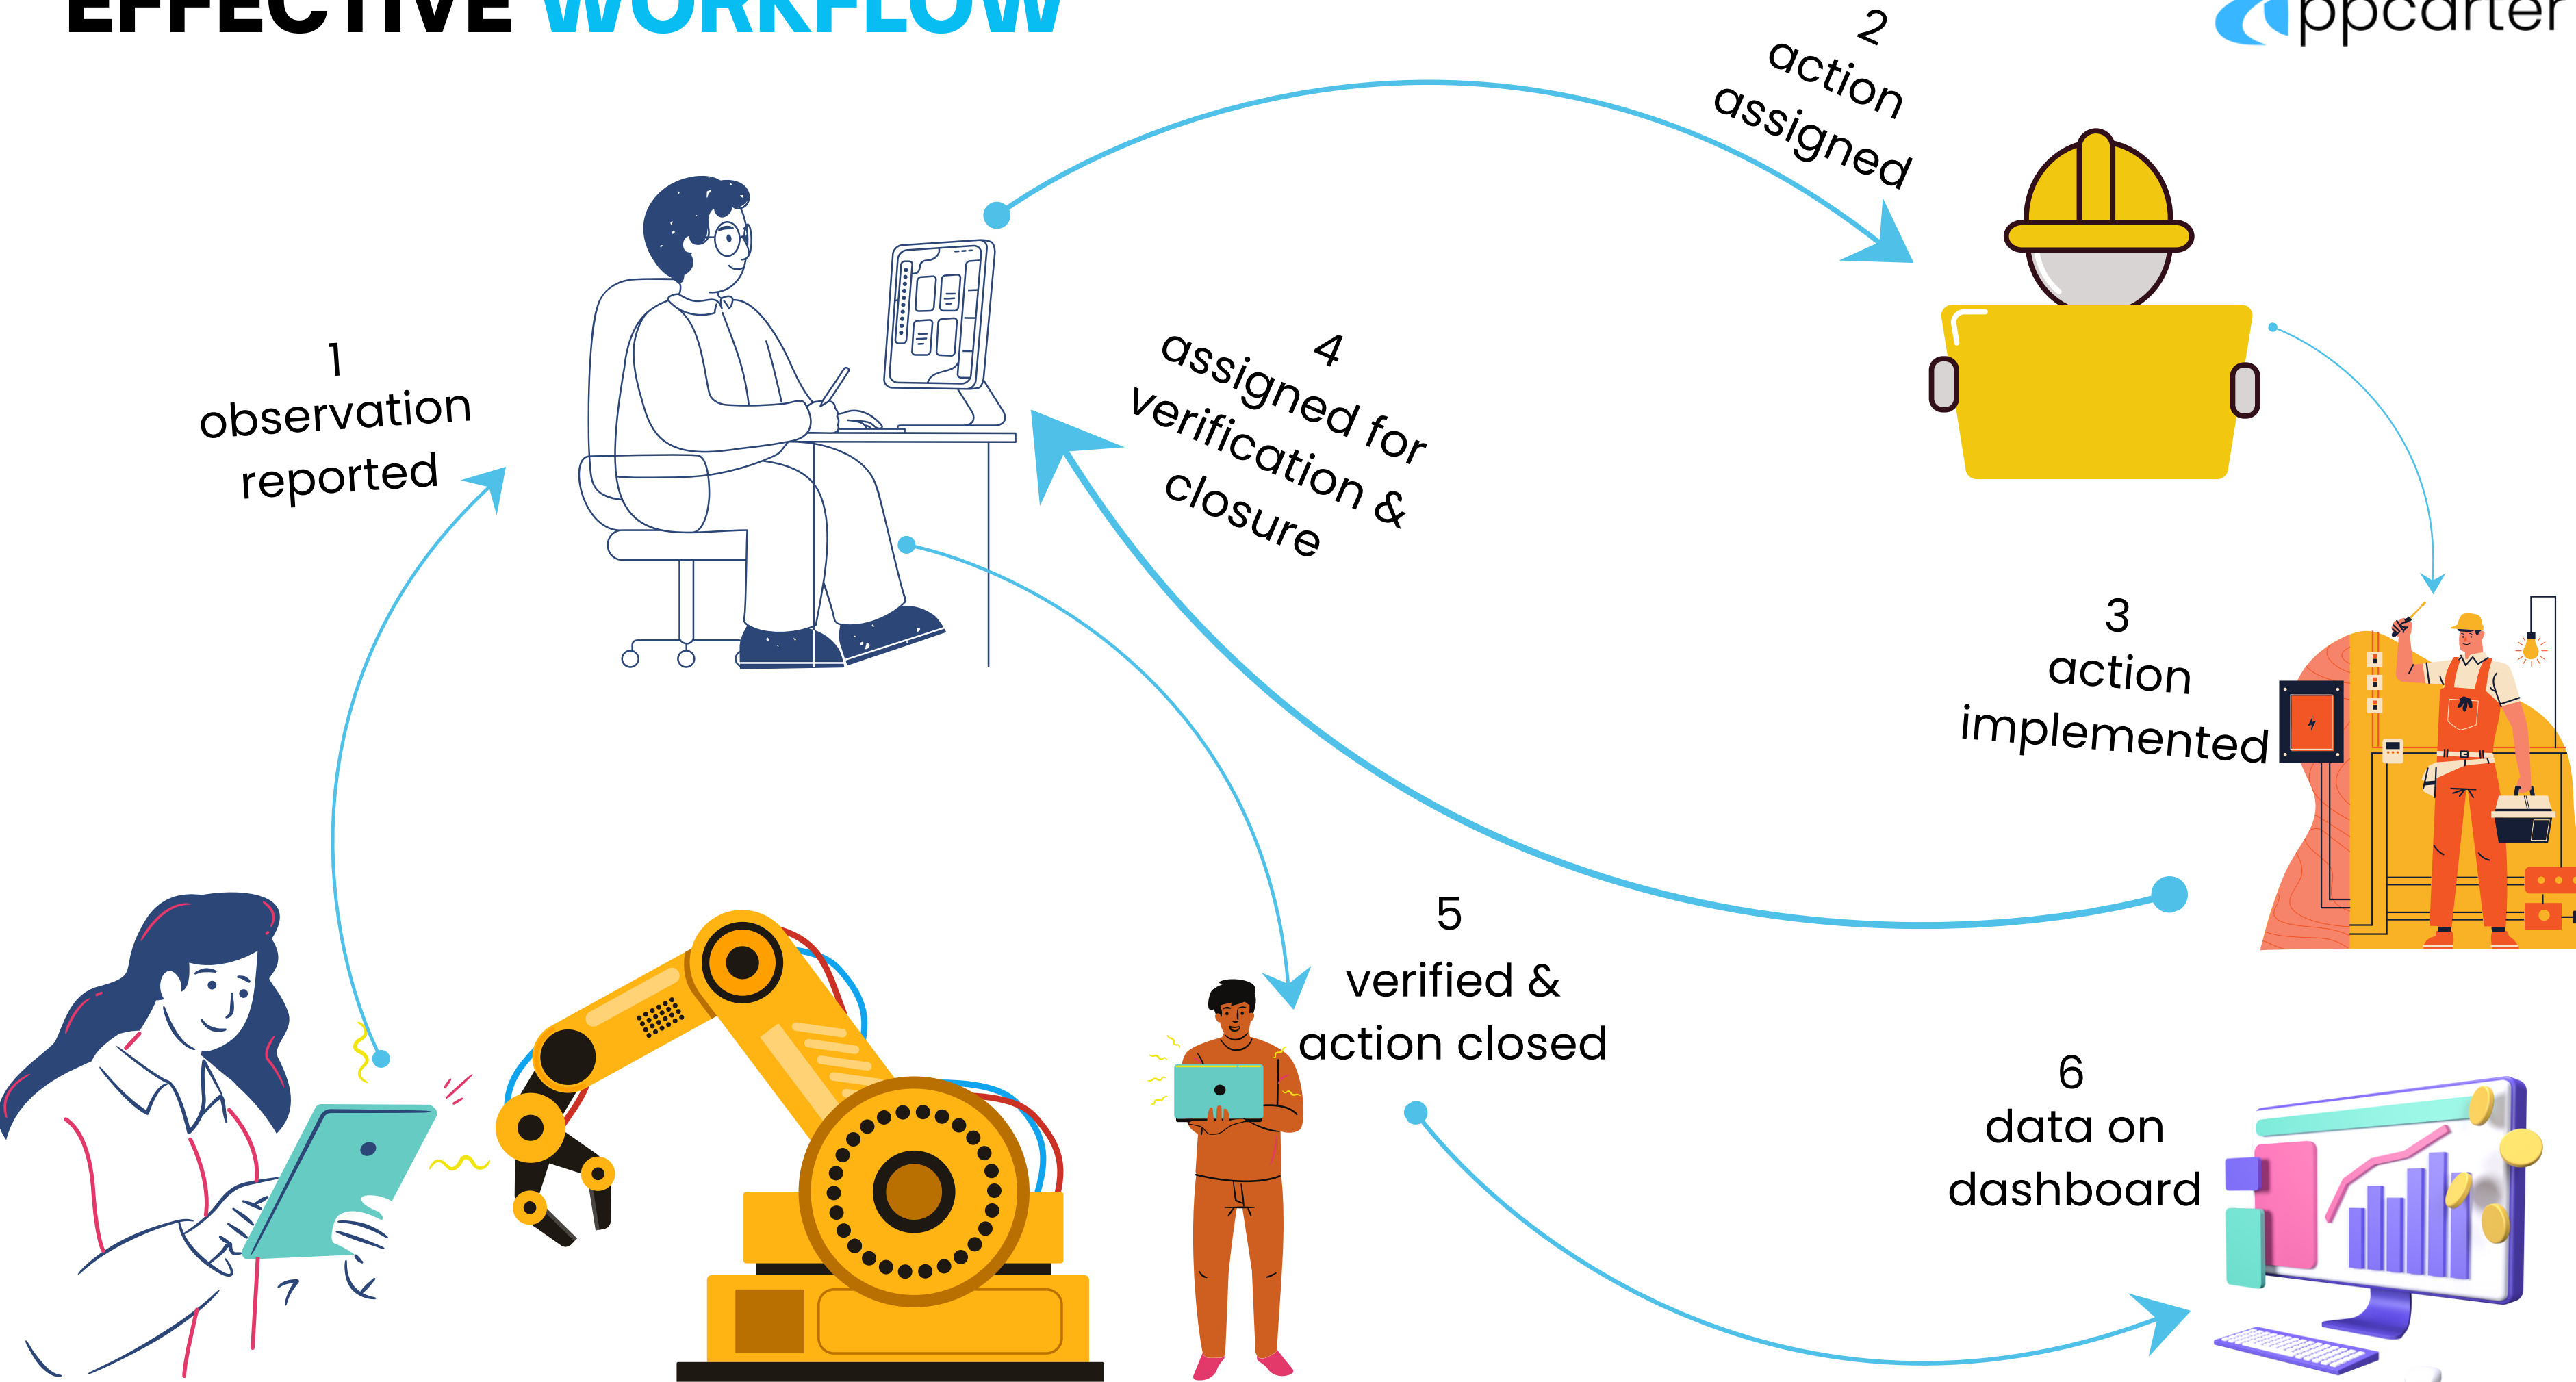

Conduct Gembas to eliminate **8 WASTES** including **DEFECTS, OVERPRODUCTION, INVENTORY, OVER PROCESSING** etc

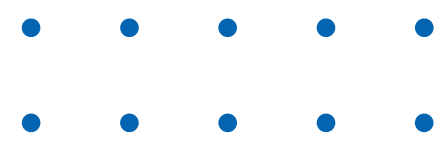

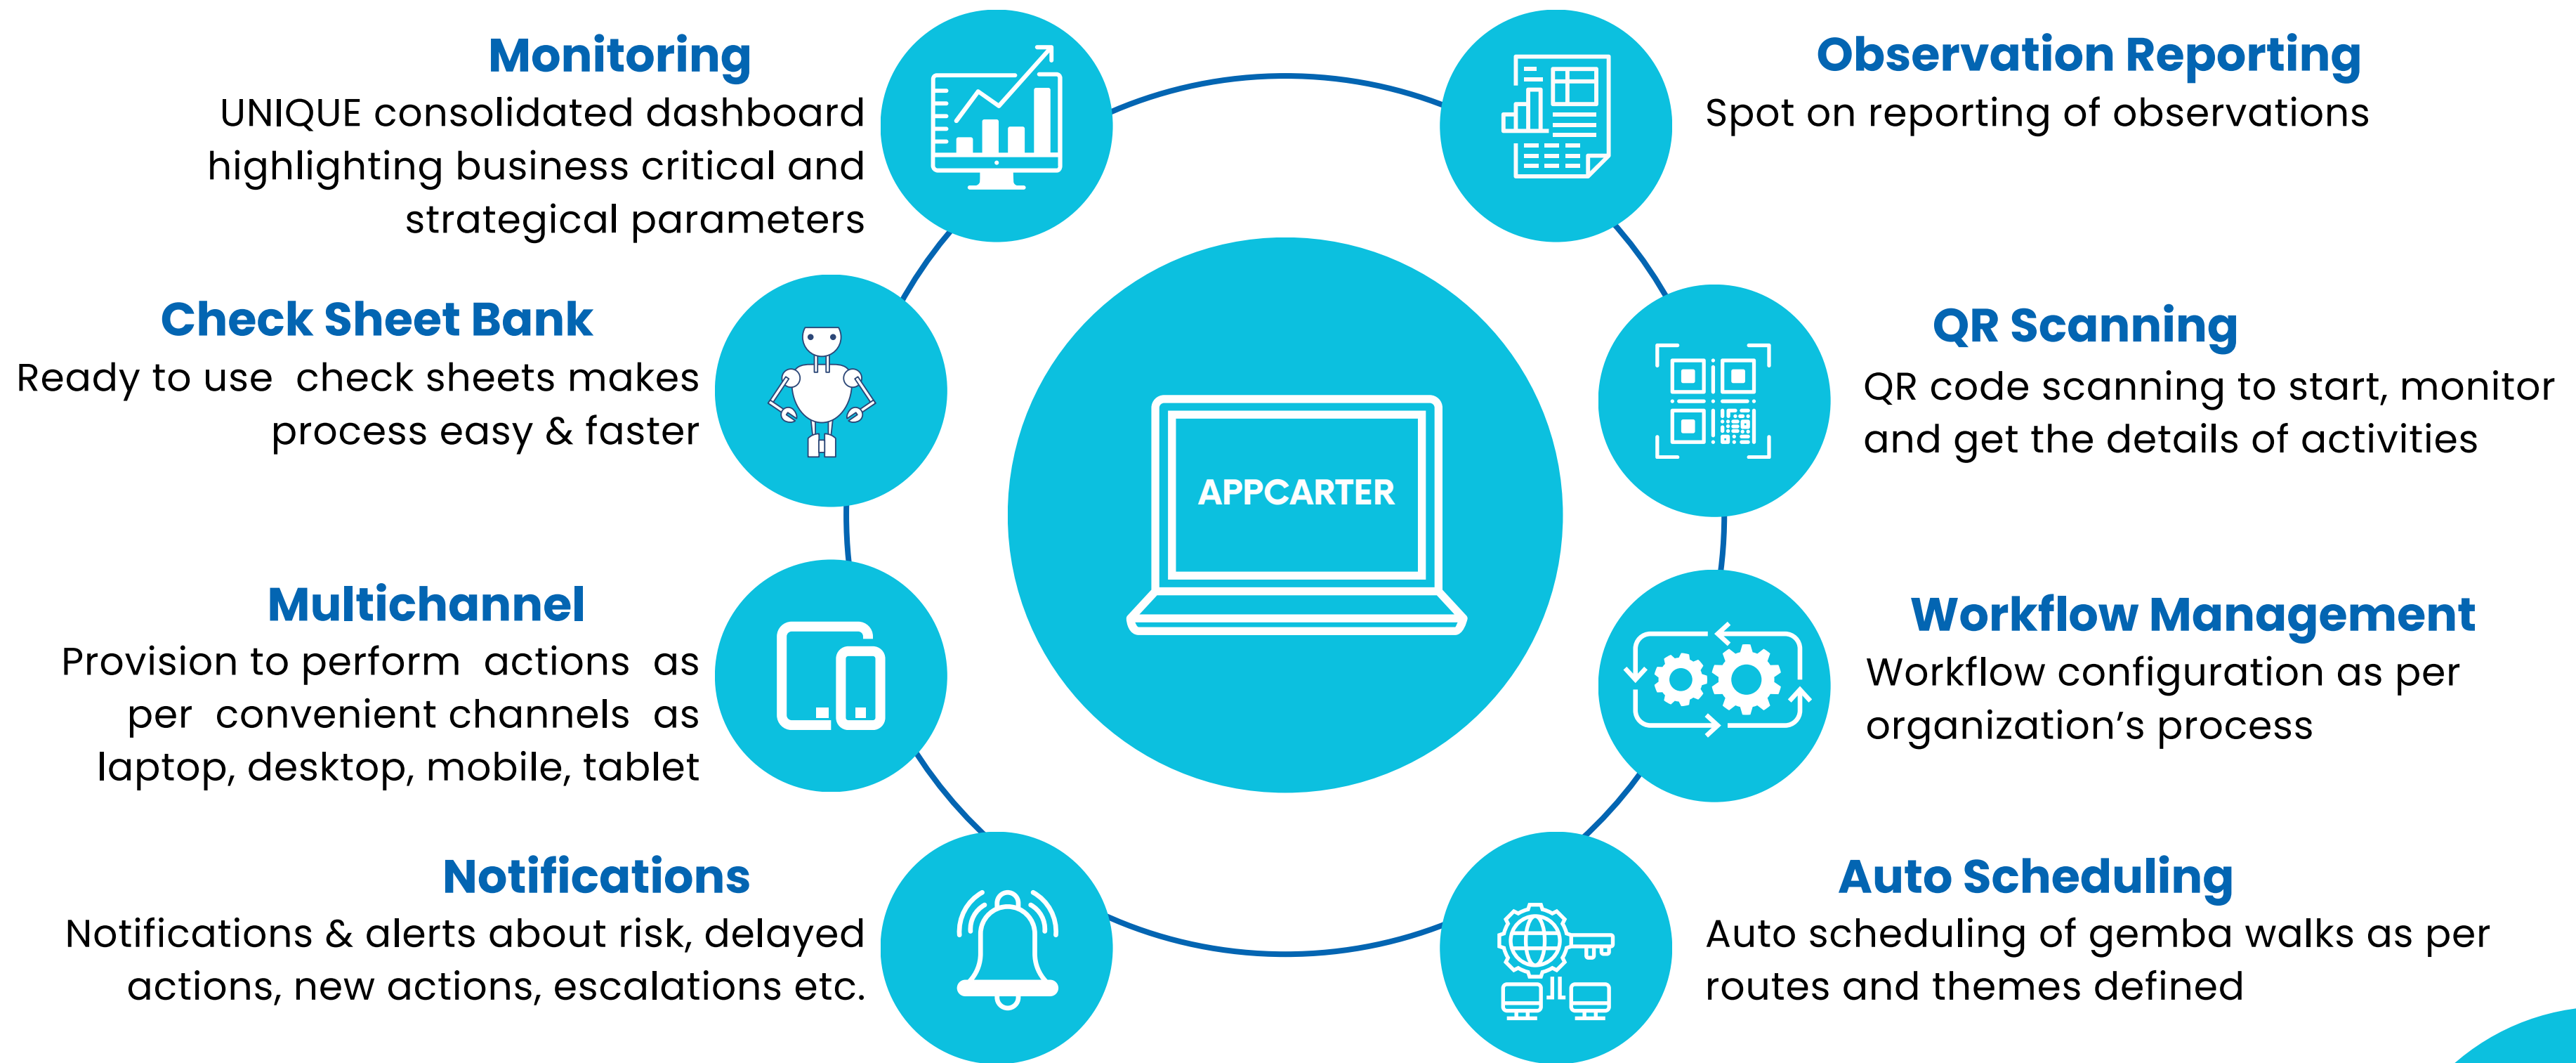

GENERAL

Flexibility to conduct Gembas even if you do not follow Theme Based or Waste Based approach

EFFECTIVE WORKFLOW
